

AWARD-WINNING CLOUD IMAGING

CELLERANT
BEST OF CLASS
TECHNOLOGY AWARD

2 TIME WINNER

- Turn-key service includes image hosting, storage, data backup, support and updates
- State of the art image enhancement tools
- HIPAA-compliant security
- Open-architecture works with your devices
- Reduces IT expenses related to onsite servers

Access Your Images From Any Location

Access, enhance and optimize your clinical images from anywhere with internet access. XVWeb gives you more flexibility to access clinical images when you need them, whether at your practice, from home or on the road.

- 24/7 access via computers, tablets and smartphones
- Full suite of image enhancement and optimization tools, including pre-set filters
- Upgradeable to 3D for CBCT compatibility

XVWeb Works, Even When Your Internet Doesn't

With XVWeb, if your internet goes down, you can still acquire images and store them locally, syncing with XVWeb once internet is restored.

- Local acquisition module keeps your workflow going, even if your internet service is interrupted
- Data automatically syncs to XVWeb once internet service is re-established

Enhanced Data Security, Reduced IT Expense

XVWeb is hosted in a secure Microsoft Azure data center, ensuring the highest level of data security and HIPAA compliance. And, since data backup, hosting, and security is all included with XVWeb, you can reduce your reliance on onsite servers, saving your practice money in the process.

Try XVWeb For Free

XVWeb's open-architecture is compatible with the majority of imaging device brands on the market.
