

EHR Mandatory Disclosure

Costs or Fees

Denticon cloud-based practice management software is provided on a monthly subscription basis, with per-user pricing. There is an additional cost for the EHR functionality per month as well as for two complementary products required for compliance—DoseSpot and Updox.

Contractual Limitations

This certified product version may require users to contract with and use DoseSpot, an online prescription service, and Updox, an online secure communications product.

The DoseSpot ePrescription service is integrated directly with the Denticon software; DoseSpot allows dentists to route electronic prescriptions to a pharmacy.

Updox is a Health Information Services Provider (HISP) that partners with EHR vendors to provide direct messaging services. Updox obtained the 2014 Edition ONC Health IT Certification for Direct Messaging on 04/10/2015 for version 2014.1. The certification number is 0410201501785. The use of Updox is required for communicating with other providers and agencies, and communicating securely with a service like Updox is required for compliance with the EHR Meaningful Use program.

Technical or Practical Limitations

This product has no technical or practical limitations.
