01

Kickoff and Denticon Setup

Let's get started! We will make introductions so you can get to know us and we can learn about you and your practice needs. We will review a timeline and answer all of your implementation questions. We will then set up your Denticon account.

02

Trial Conversion

Our trial conversion allows your practice to audit the data and will populate Denticon with familiar data for trainings.

Final Conversion

After the trial conversion audit, we will retrieve a final copy of your legacy data and upload to Denticon for the final conversion.

04

Live-Date and Beyond

Congratulations on joining the Denticon cloud! Our team is here to ensure a smooth transition on live-date and beyond. Your practice will continue to receive lifetime support through our accounts and customer care teams.

03

User Training

We offer trainings for all levels of Denticon users. Our trainings will equip users with skills they need so they can work confidently and effectively within Denticon.
