DIGITAL CHECKLIST

Is Your Dental Imaging Solution Cost-Effective, Scalable, and Secure?

Successfully managing growing imaging databases for a modern dental practice can be challenging. Investing in the right imaging technology will help your practice **deliver better clinical outcomes and a better experience** for you and your patients.

Does your practice have the right imaging solution that's cost-effective, scalable, and secure? Take this quick assessment to find out if your imaging solution is up to the task.

My Dental Imaging Solution:

For Dentist Owners/Dentist Partners/CEOs:

MY SOLUTION:

☐ Provides good ROI through reduced reliance on servers and increased efficiency

☐ Is open-architecture so it's compatible with any major imaging sensor or device

☐ Has cloud accessibility so I can access anytime anyplace

☐ Offers 3D functionality so I can access and manipulate 3D files online

☐ Will scale with my practice if I have increasing data needs

☐ Required minimal training before my staff and I were able to use software

☐ Allowed for a disruption-free conversion with no impact to our practice

☐ Has predictable and affordable monthly pricing

___ **/8 Total checked boxes**

For Office Managers/IT Managers/CTOs:

MY SOLUTION:

☐ Increases security by eliminating need for remote login or VPN

☐ Includes HIPAA compliant sharing portal

☐ Is device agnostic, reducing IT strain

☐ Is DICOM compatible, saving our practice money on conversions

☐ Does not require an expensive monthly support subscription

☐ Includes lifetime upgrades, updates, and support

☐ Had conversion done by in-house experts, not outsourced

☐ Lets me standardize and centralize imaging software across all locations

___ **/8 Total checked boxes**

Move to Apteryx Imaging XVWeb with a seamless conversion to a modern imaging solution with cloud functionality. Read about the implementation and conversion process to learn more about moving to XVWeb.

LEARN MORE

Experience the ease of working with software that's universally compatible, saves in the DICOM standard, and cloud-accessible. XVWeb offers more flexibility and scalability than any other dental imaging software.
