# Denticon Practice Management Software with Apteryx Imaging

Save time and streamline workflows with seamlessly integrated patient imaging. With Apteryx Imaging embedded directly into Denticon Practice Management, your clinical team will never have to bounce between multiple software solutions again!

Secure Access to Patient Data Anytime, Anywhere

- **Access and analyze** patient information, including X-rays and oral health history, either at the office or remotely

- **Easily share patient images and data** with HIPAA compliant online image sharing and web-based referral management

Boost Efficiencies and Scale with Integrated Imaging

- **Capture, view, optimize, and compare** images without ever leaving Denticon Practice Management Software

- **View all historical images** for a specific tooth directly from the odontogram

Knowing **I can collaborate with anyone from anywhere** in the world is a great benefit. Everything is at your fingertips, from X-rays to panoramic images; it's all accessible in the cloud.

Dr. Jonathan Penchas | Founder and Managing Partner of Midtown Dentistry

Image Capture

Seamlessly capture images from sensors and store them both locally and in the cloud

Cloud Enabled Storage

Images are automatically backed up and stored securely in Microsoft Azure

Device Agnostic

Apteryx Imaging software is **compatible with most major imaging sensors** and hardware on the market

Image Enhancement

Edit, enhance, and annotate patient images with customizable filters and easy-to-use label markers

Analytics Dashboard

Gain a deeper understanding of production and equipment needs with insights on retakes by person and capture station

3D Imaging Module

Capture, view, share, and store 3D CBCT images in the cloud

Enhanced Security

Planet DDS solutions offer peace of mind with **robust, HIPAA-compliant security measures** to protect patient data.
