PERIODONTAL & IMPLANT ASSOCIATES

Success Story: Periodontal & Implant Associates

Periodontal & Implant Associates rely on Planet DDS for end-to-end clinical and administrative practice management.

Problem

- Multiple practices were using different software platforms that did not easily integrate, which created inefficiencies and made it difficult to access patient information.

Solution

- Planet DDS is a web-based platform, making it convenient and efficient for Periodontal & Implant Associates to manage patients across multiple practice locations.

Benefits

- Greater Efficiency: One platform to handle all administrative and clinical needs, even across multiple locations.
- Improve Accessibility of Information: Securely access and manage information from referring practices and within your clinic anywhere, anytime.
- Effective Support: Planet DDS works with you to ensure optimal onboarding and compatibility with your practice.

Introduction

Prior to onboarding Planet DDS, Periodontal & Implant Associates owner Dr. Eric Weiss, was using multiple software programs requiring complex integrations. This resulted in inefficient patient management and clinical processes.

Dr. Weiss turned to Planet DDS, and is now using solutions Denticon Practice Management Software and Apteryx Imaging to streamline administrative and clinical work between his practices, all-in-one platform.

End-to-End Practice Management

From imaging workflows to overall practice management, Periodontal & Implant Associates uses cloud-based Planet DDS solutions.

"We use Planet DDS for absolutely everything to run our practice. It's amazing because we have everything we need on one platform from a clinical perspective as well as patient management. This includes billing, x-rays, taking 2D images, storing 3D images, periodontal chartings, CBCT scans, the list goes on. Plus, with multiple locations we can access our data across multiple practices."

Secure Access to Data and Information from Anywhere, Anytime

Periodontal & Implant Associates is a referral-based practice, with a substantial amount of communication coming from referring practices. All information can be easily accessed within Planet DDS solutions.

"Planet DDS is so convenient. Because it's web-based, I can access it from anywhere. Even if I'm traveling or at home, I can access the information I need as if I was at my office. That level of convenience is unparalleled."

Aligns with the Specific Needs of Your Practice

Planet DDS supports clinics through onboarding and maintains open communication with clients to ensure optimal compatibility.

"As a periodontist, we have very specific needs around the type of data we store. I suggested a change to the periodontal charting model. Planet DDS made the change and implemented it within 6 weeks. I greatly appreciate that kind of agility. I'm super impressed with the support. It's the best support I've ever gotten from any software."
