

Denticon Pay

SEAMLESS, SECURE, AND SCALABLE

INTRODUCING DENTICON PAY

A secure and simple way to accept patient payments!

Denticon Pay is a comprehensive payment acceptance solution that uses Payment Card Industry (PCI)—validated point-to-point encryption (P2PE) technology to protect your patients' payment data instantly upon entry at the device. This means that your practice **never stores, processes, or transmits any sensitive information, safeguarding your patient's data and lowering your PCI compliance burden.**

PCI Validated P2PE Compliance

Devices have tamper-resistant encryption keys backed by the PCI Security Council.

Network-Enabled Payment Devices

Seamlessly connect multiple devices to one workstation for maximum flexibility.

Online Onboarding Tool and Same-Day Approvals

Our web-based onboarding system is designed to be user-friendly and, in most cases, enables clients to self-serve and onboard new locations with same-day application approvals.

Accept All Major Forms of Payment

Accept credit and debit cards, and contactless payments such as Apple Pay, Google Pay, and TAP technologies, as well as create customized payment plans for your patients.

Automatic Payment Posting to Denticon

Payments will automatically post into the Denticon ledger, minimizing errors and maximizing efficiency.

Exceptional Level of Support

All Denticon Pay customers will have a dedicated support team. Our clients can rest assured that they will receive the best experience possible.
