Planet DDS API Program

PARTNER WITH PLANET DDS TO ACCELERATE YOUR GROWTH

Join a community of partners building solutions for the dental sector and our shared customers to drive more revenue, expand reach, improve customer experience, and retain customers.

Planet DDS API Program is for software companies that develop applications that extend functionality on and for Denticon. When you join the program, you gain access to our APIs and documentation, enabling you to integrate your solutions with Planet DDS products more quickly and easily.

Whether you're looking to integrate your software into Planet DDS platforms or expand its reach and capabilities with seamless integration and faster data access, we can help you deliver elevated customer experiences and unlock new revenue opportunities for your business.

Grow & Retain Your Customer Base

Almost all the 13,000+ practices we serve use more than two solutions to grow their dental businesses. With this program, we are making it easier than ever for our partners to extend their solutions to our shared and new customer base so that they can pick the right solutions that will help their business grow.

Gain Competitive Advantage

With the Planet DDS API Program, you'll be able to connect with thousands of practices in a secure, trusted platform with SOC-2 Type 2 certification, stay close to our product roadmap and leadership teams as we build a long-standing partnership together, and gain early access to beta releases, up-to-date tools, and sandbox.

Expand Your Technology

Replacing patchwork solutions with a unified system establishes trust with customers, delivers value, and generates new and incremental opportunities. Through our program, you'll be part of a community powering the latest dental innovations—from RCM to AI, Patient Engagement, and clinical solutions.

Multiply Opportunities

Help our mutual customers by letting them connect to your applications quickly and easily within our ecosystem. When you partner with Planet DDS for growth, you're working with the industry leader to create engaging, integrated experiences that instantly connect everyone to everything to ensure growth.
