

DentalOS™

The Growth Platform of Next Generation DSOs

Dental software is broken. It wasn't built to meet the needs of modern DSOs. As multi-location organizations expand, they face the limitations of rigid, legacy systems that stifle growth, inhibit efficiency, and fail to scale.

It's time for a change.

At Planet DDS, we're on a mission to fix dental software.

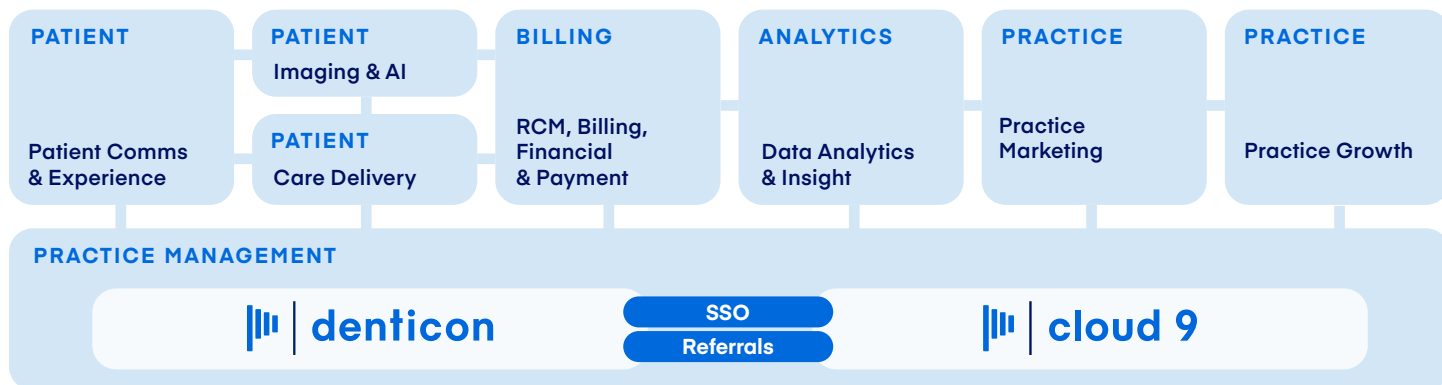

Why Legacy Systems Fail DSOs

- ✔ Fragmented workflows
- ✔ Increasing complexity
- ✔ Lagging innovation
- ✔ Inability to standardize or centralize
- ✔ Limited customization
- ✔ Unreliable data
- ✔ One-size-fits-all constraints
- ✔ Operational inefficiencies

Introducing DentalOS and Planet DDS Open APIs

DentalOS is an open, unified platform built to meet the evolving needs of DSOs, integrating every aspect of operations—from practice management and imaging to patient communication and RCM. Designed to scale, it offers flexible integration and customization tailored to your organization's needs.

THE PLANET DDS DENTALOS PLATFORM

Our Partners: Driving Industry Innovation Together

We partner with the best in the industry to bring you a platform that's powerful, flexible, and constantly improving.

API PARTNERS

And Many More Coming Soon!

DentalOS: Designed to be Different

A True Open API Approach: DentalOS enables DSOs to build their technology stack based on their needs, seamlessly integrating with leading partners and home-grown solutions.

Data Integrity: By collaborating with our leading API partners, DentalOS enables DSOs to eliminate data silos, reduce administrative work, and enhance data-driven decision making.

Future-Proofing Your Tech Stack: With a commitment to continuous development and integration, DentalOS equips DSOs with the agility to lead no matter how many locations you manage.

Trusted by Industry-Leading DSOs and Partners

Planet DDS has over 20 years of experience onboarding DSOs and empowering growth.

*We're unlocking a new era of customization and interoperability for our DSO. DentalOS allows me to **build custom tools and workflows for our team** of clinicians that will make their jobs easier and make the patient experience even more seamless.*

ROD GANJIFARD VP of Technology, Onsite Dental

*DentalXChange leverages Planet DDS APIs to **deliver transformative RCM experiences**. With Planet DDS APIs, we have consistently delivered high-performing, integrated solutions to our customers with tremendous time-to-value.*
