

Planet DDS Pay STANDALONE

Newly acquired locations can accept payments before they're fully onboarded to Denticon or Cloud 9. Setup carries forward at conversion.

PART OF PLANET DDS PAY, INCLUDED AT NO ADDITIONAL COST.

Every acquisition closes on a timeline; software onboarding doesn't always match.

Between close and go-live on your core platform, payments can keep flowing to the seller, run through a temporary workaround, or pile up as manual reconciliation and duplicate setup work.

Planet DDS Pay: Standalone closes that gap. A newly acquired office can start accepting payments into your organization's bank account from day one with setup that carries forward at conversion.

What Changes for Your Organization

WHAT YOU'RE DEALING WITH TODAY	WHAT YOU GET WITH PLANET DDS PAY: STANDALONE
Between close and go-live on your core PMS, payments can keep flowing to the seller's account.	Control deposits fast. The acquiring organization controls deposits from the moment the transaction closes, with no temporary merchant solution needed.
Newly acquired locations often wait on your core PMS onboarding timeline before they can accept payments at all.	Activate on your own timeline. A newly acquired office can accept card-present payments, payment links, and manual entries before full onboarding, targeting under five business days to first payment.
Merchant setup often gets redone when a location converts to the core PMS.	No re-setup at conversion. The same Stripe Connect Account ID carries the setup forward at conversion. No repeated merchant onboarding.
Multi-product DSOs need a payment approach that works across their platform mix, not just one PMS.	Works across your platform mix. The standalone version works for either PMS, so running both Denticon and Cloud 9 isn't a blocker.
Standalone processing during the bridge period still needs to protect margin on card transactions.	Surcharging available. Optional credit card surcharging, configurable 0–3% by the org admin, carries the same margin protection into the bridge period. Debit, HSA, and FSA are always exempt.

Built to carry into Denticon and Cloud 9

Runs on the same Stripe Connect Account ID that carries forward at full onboarding: the same payment infrastructure the location will use going forward.

Transaction records from the standalone period are available for staff to post into the legacy PMS during the transition window without re-keying each one.

Part of Payment+

The Payment+ suite brings every financial capability into Denticon and Cloud 9 natively starting with Planet DDS Pay and surcharge recovery. As new capabilities roll out, they add to the setup you already have. No new system, no new login, no repeat implementation.

800 to 1200+

DSO-driven practice acquisitions completed per year, industry-wide.

69%

 of DSOs expect their sponsors to push acquisition activity higher in 2026.
